## ISO 14001

Peppers Cable Glands Ltd (PCG) designs, manufactures and supplies industrial and hazardous area cable glands, thread adaptors, stopping plugs and associated accessories to British and International Standards.

Our aim is to consider environmental issues with respect to the operation of the business on a regular basis. We will achieve our environmental objectives by keeping staff involved, motivated, well informed and appropriately trained. We undertake to consult, listen to, inform and respond to all those that have a stake in the environmental performance of our company.

Peppers Cable Glands recognises that many resources are finite so we must use only what we need, seek alternatives where possible, recycle as much as we can and dispose of as little as necessary. This will be achieved by the ensuring that the design, manufacture, marketing and disposal of our products, services and facilities are performed using sound product stewardship and design policies.

The company understands that to obey the law is a minimum and we will therefore look towards relevant best practice, especially regarding the prevention of pollution. Our intent is to implement and maintain a companywide Environmental Management System in accordance with but not certified to the principles of ISO14001.

Through this we shall monitor and undertake regular reviews of our environmental performance – to make sure we do what we say, correct our failings and undertake continuous improvement activities to enhance our performance.

The Quality Manager has the delegated responsibility overall for the environmental affairs of the Company. As such they will ensure the policy is implemented and progress monitored.

The Senior Management Team will annually review its policy to ensure its relevance and appropriateness.

The Quality Department shall be responsible for the day to day application of the policy, acting as an intermediary and facilitator between all interested parties, and for ensuring that the management is fully briefed at all times on environmental matters.

For and on behalf of Peppers Cable Glands Ltd.

Grayham Churchouse

General Manager
