Single Compression Gland for Armoured and Unarmoured Flat Cable featuring a Male Conduit Connection

Ex db : Ex eb : Ex nR : Ex ta : IP66 : IP68 : Class I Zone 1 : AEx eb : AEx ta

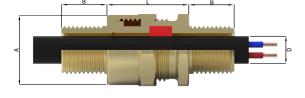

## PRODUCT DESCRIPTION

"A8CM" type glands are certified Flameproof Ex db, Increased Safety Ex eb, Restricted Breathing Ex nR and Dust Protected Ex ta. They are suitable for use in Zone 1 and 2 for Gas Groups IIA, IIB and IIC and additionally for use in Zones 20, 21 and 22 for Dust Groups IIIA, IIIB and IIIC. Also certified for Zone and Division installations for use with Marine Shipboard and Tray Cables under the NEC and CEC. Developed for flat cables, they provide controlled Ex db, IP sealing and have been tested to IP66 and IP68 to 50 metres. The "A8CM" version is designed to accommodate unarmoured and armoured cables where sealing and retention is required only on the outer sheath and additionally provides a male thread for the connection of conduit.

Gland size does not necessarily equate to the entry thread size.

Dimensions (A) & (B) may differ for glands with non metric entry threads. Please refer to our
 "Thread Reference Tables" for specific dimensions.

Assembly instructions must be read prior to installation and adhered to in full.

 Peppers supply products with parallel entry threads that conform to the flameproof threaded joint requirements of IEC/EN 60079-1 and other equivalent standards. We usually incorporate a thread run out according to general machining techniques and parts will not have a full form thread for the entrie length. Peppers Cable Glands Limited will not be held responsible for clients installations where this has not been taken into account. When selecting IP Washer & Shroud material for use with glands, please be aware of the
accessories temperature range to ensure they are suitable for the intended installation.

Where approval in addition to UKEX, ATEX, IECEx and CSA is required, this must be clearly

requested at time of enquiry / order.

\* Size 25 is not covered for RS applications.
