- NOTES
- Assembly instructions must be read prior to installation and adhered to in full.
 - For Ex db applications female threads must comply with clause 5.3 of IEC 60079-1.
 - For Ex nR applications parallel entry threads must be installed with a suitable entry thread seal.
 - Where applicable, the standard O-ring material is nitrile. Other options are available upon request.
 - Aluminium versions are not suitable for Group I Mining applications.
 - Only products with Metric and NPT threads are marked with CSA approval.
 - Brass products are not marked or intended to be used in Class I Division 1 installations.
 - Peppers supply products with parallel entry threads that conform to the flameproof threaded joint requirements of IEC/EN 60079-1 and other equivalent standards. We usually incorporate a thread run out according to the general machining techniques and will not have a full form thread for the entire length. Peppers Cable Glands Limited will not be held responsible for clients' installations where this has not been taken into account.
 - Where approval in addition to UKEX, ATEX, IECEX and CSA is required, this must be clearly requested at time of enquiry / order.
