

Declaration regarding UK REACH and EU REACH

Peppers Cable Glands Ltd designs, manufactures and supplies industrial and hazardous area cable glands, thread adaptors, stopping plugs and associated accessories to British and International Standards.

This declaration is made in regard to the Registration, Evaluation, Authorisation and Restriction of Chemicals (commonly abbreviated to REACH) and the following pieces of legislation:

- EC Regulation No. 1907/2006 on Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) for the identification of a substance as a Substance of Very High Concern (SVHC).
- UK REACH Enforcement Regulations 2008
- UK REACH (Amendment) Regulations 2023

Based on statements obtained from our suppliers and our own research, we declare that no materials from the ECHA (European Chemicals Agency) Candidate List or the SVHC List are included in our products or packages with one exception below. Should it be found in the future that our products or packages contain SVHC materials, we will inform our customers immediately.

- Lead (Pb) (List no. 231-100-4) as an alloy element of standard brass metals used in the manufacture of our articles. Brass (List no. 603-111-8) used in supplied products is not identified as hazardous on the ECHA database.

Our Eco Brass offering does not contain lead.

REACH legislation applies to individual chemical substances in isolation, in preparation or in articles (if the substance is intended to be released during normal and reasonably foreseeable conditions of use from an article). Peppers supplies products that are “articles” not “chemical substances”. Being classified as “articles” under article 33, we are required to ensure that sufficient information is communicated down the supply chain to allow the safe use of articles by end-users including consumers. The product in normal use does not constitute a risk to the user. The articles of the product are only handled in the commissioning, decommissioning of installations or periodic inspection. Our products are therefore exempt from the registration requirements.

The declaration is made in accordance with the ECHA “Guidance on requirements for substances in articles” and the ECHA SVHC candidate list updated on 23 January 2024.
